

## Cyber-shot® Digital Still Camera

## ▲ Step-up Feature

## ◆ New Feature

## Benchmarks in resolution, convenience and control.

- ▲ **1/1.8" 5.1 Megapixel Super HAD™ CCD**  
Super HAD (Hole Accumulation Diode) CCDs provide excellent image quality by allowing more light to pass to each pixel, increasing sensitivity and reducing noise.

- **3X Optical/2X Digital/6X Total Zoom**  
Optical zoom helps you fill the frame with your subject for better pictures. And Sony's Precision Digital Zoom helps bring your subject closer with an extra 2X magnification.

- ▲ **0 -12.0X Smart Zoom™ Feature (at VGA Resolution)**  
The Smart Zoom feature intelligently uses the full CCD to let you zoom into the portion of interest by cropping the image size-thus avoiding the image degradation of Digital Zooms.

- **Carl Zeiss® Vario-Tessar® Lens**  
The Vario-Tessar lens is specially produced for very compact cameras. This specialized design allows quick auto-focus, appealing zoom range while still maintaining a compact design.

- **Real Imaging Processor™ Technology**  
The innovative Real Imaging Processor in the DSC-W5 not only improves picture quality and clarity but also improves camera response time, decreases shutter lag and improves battery stamina.

- **2.5" LCD Monitor**  
The extra-large high-resolution 115K LCD Monitor makes framing shots and reviewing pictures easy.

- **Live Histogram Display**  
Available in capture and playback the Live Histogram Displays the concentration of pixels at each luminosity value making it easy to evaluate correct exposure.

- **14-Bit DXP A/D Conversion**  
Sony's 14-bit Digital Extended Processor captures the range between highlight and shadow with up to 16,384 values, for extended dynamic contrast and detail.

- **5 Area Multi-Point Auto Focus**

By evaluating 5 separate focus areas of the frame, Sony's Multi-Point AF system can intelligently focus on the subject and avoid mistakenly focusing on the background.

- **Manual Exposure Mode**

Manual Exposure Mode provides extended control with 46-step adjustable Shutter speed (30-1/1000 sec.), and 2-step Aperture control.

- **AF (Auto Focus) Illuminator**

Briefly illuminating the subject, in low-or no-light conditions, the AF Illuminator helps establish a positive focus lock.

- **Selectable Focus Mode**

Monitoring AF (Auto Focus) helps you anticipate the action by focusing even before you press the shutter release.

- **Multi-Pattern Measuring**

Independently light-metering 49 points of the frame, Multi-Pattern Measuring establishes the optimum exposure, even when highlight and shadow isn't centered in the frame.

- **Scene Selection Mode**

With 7 Scene Modes, parameters can be matched to the shooting conditions. Choose from one of the following: Twilight, Twilight Portrait, Soft Snap, Landscape, Beach, Snow, Candle.

- **Pre-Flash Metering**

With a momentary pre-flash, the camera illuminates the subject and sets exposure through the lens for accurate flash metering. Adjustable flash level and red-eye reduction ensure great flash shots.

- **Slow Shutter Noise Reduction**

During long exposures, Slow Shutter NR captures the scene, and then the CCD noise pattern with a dark frame exposure. By subtracting the two, even long exposures can be clear.

- **Memory Stick® Media and Memory Stick**

Digital. Powerful. Transportable.™  
Memory Stick® media is compact, portable and rugged:connecting a variety of hardware and software applications.

- ◆ **32MB Internal Memory¹ Included**

Shoot without a flash memory card with 32 MB internal memory¹; Slot for optional Memory Stick®, Memory Stick PRO™ media. Full 32MB of internal memory can be copied to optional Memory Stick media.

- **9 Shot Burst Mode**

Capture up to nine 5MP shots (fine) or 100 shots VGA (standard) at 0.7 frame/sec. Perfect for high speed subjects or fast moving action such as sports or small children.

- **Multi-Burst Mode**

Captures 16 320x240 frames as part of a single 1280x960 image which plays back sequentially in the camera. Selectable 1/7.5, 1/15, 1/30 second.

- **MPEG Movie VX Standard/Fine Mode**

Captures VGA (640x480) high frame rate (up to 30 frames per second) audio/video clips with length limited only by the capacity of the media. Video mail mode captures smaller file sizes suitable for email.
